## 一. Recording

### 1、 Ordinary recording/save

Please push on-off key to start recording without earphone ,push to off will save the record and power off

Please don't connect computer during recording , it will lead to the file lost.

### 2、 Voice activate recording

Please push power key to "On" start recording without earphone, after the light is red ,keep pressing "-"button until the red light flash a few times, it means we had enabled the voice activate recording. When you push to "off" will save the record and power off.

Please note: The voice activate function need to turn on every time when using.

### 4.recording while listening

Without earphone, press"+"and "-"button at the same time and push the power key to "ON" until the light turns off, then you can plug in earphone to listen when recording. When you push to "off" will save the record and power off.

### 5.long time recording

Please push on-off key to "ON" without earphone plug in,when the light comes on, long press "+"button until the red light turned off.

Please note: you need to set it every time if enable the Ultra long time record mode (recording time will extend to 3 times)

### 6.check the recording status

In recording mode, long press"+"or"-"and hold down, red light flash means working.

## 二. .time

### 1、Time setting

Update the system time: connect the device to pc, then go to removable disk, you need to copy the folder, named“录音笔时间同步工具”, to the desktop. secondly, open the folder and double click “录音笔时间同步工具”,will show as follow:

Make sure the computer time is accurate, if yes, click “set time”, will show as above, the time setting is finished.

Please note: before formatting the device, please back up this folder to prevent it from being lost.

## 三. Paly

1.Please push on-off key to “on” with earphone connected .short press“-”button switch the music play mode/recording mode; press“+”and “-”at the same time when playing for pause; press“+”or“-”button at same time again will continue playing.

### 2.volume adjustment/mode shift

In play mode, long press “+”or“-”for turning up or turn down the volume and short press “+”button shift to next track.

## Troubleshooting:

### 1.can not recording suddenly

Please back up all files you need,then format the machine in pc ,If the device can be used normally after formatting,please scan the compute rfor cleaning,this situation belongs to the computer virus infection recorder.If the situation last long time may cause damage to the machine and it can not be repaired.

### 2. the indicator light can not react or always light out of the normal state

Please back up all files you need,then restore the factory default settings.after connecting PC,click my computer → find the mobile hard disk drive →choose to format by right click → format fast.

### 3.the computer can not react when connected via USB

First check if the plug is inserted in place,if the computer still not react,try to change computer because some computers miss drivers and cannot be recognized.After the attempt,it is still wrong,you can contact after-sales service.

The machine comes with intelligent reset system, please connect the computer before you save the file is being recorded. As the sound recording of this product and the sound quality is relatively clear parameters, so the recording file is relatively large, please promptly extract, the company is not responsible for the loss of data

## Specification
